

1. How grid and mainframe computing are related to cloud computing
2. Cloud delivery model and deployment model
3. Cost management in cloud computing
4. Security overview in cloud
5. IaaS vs PaaS vs SaaS: Management, scalability, security...
6. Scalability: vertical vs horizontal
7. Hybrid cloud: security, scalability, cost
8. Distribution of DC: impact on latency/availability
9. Multinancy
10. Virtualization
